Message from the Minister

I am pleased to present the 1988 edition of New Brunswick's "Directory of Products and Manufacturers", which is intended to provide a reference tool of current information on New Brunswick's manufacturing and processing firms.

New Brunswick companies are gaining a reputation for excellence. From state-of-the-art military vessels and world-renowned bronze-cast cymbals, to processed food products and lapel pins, New Brunswick companies provide local and export markets with high quality products and services.

The provincial government, through the Department of Commerce and Technology, supports and encourages the establishment and expansion of industry within the province. Companies are encouraged to add value to existing products, and to develop new products and processes by using the latest technologies to their best advantage.

This Manufacturers' Directory includes 1,567 firms which provide, at the seasonal peak, up to 56,451 jobs for people in this province. I would like to thank each manufacturer for supplying information for this Directory, and trust that it will serve manufacturers, buyers and the public, both at home and abroad.

A. W. (Al) Lacey,
Minister

FOREWORD

HOW TO USE THE DIRECTORY

Immediately following the foreword there is a prefatory section containing general background information relative to the Province of New Brunswick.

The directory consists of four major sections followed by two appendices:

SECTION 1
NEW BRUNSWICK PRODUCTS —
ALPHABETICAL CLASSIFICATION

Products manufactured in the province are itemized alphabetically in this section. Every product is followed by a list of the appropriate manufacturers' names. Details with respect to the manufacturers so listed are not repeated in this section, but may be readily obtained by reference to Section 2.

SECTION 2
NEW BRUNSWICK MANUFACTURERS —
ALPHABETICAL CLASSIFICATION

New Brunswick manufacturers are listed alphabetically by establishment name. The name is followed by the mailing address and then the plant location when it differs from the former. After this the contact's name, telephone, fax and telex numbers are indicated. Then the Standard Industrial Classification (SIC) is listed indicating the industry/ies assigned to the establishment, the first SIC listed being the major industry, for each firm. Following is a list of products and an employment figure.

Inquiries for a listing of firms by specific industry groups will be handled by the Department of Commerce and Technology upon request.

SECTION 3
NEW BRUNSWICK MANUFACTURERS —
COUNTY CLASSIFICATION

The Province of New Brunswick is divided into 15 counties: Albert, Carleton, Charlotte, Gloucester, Kent, Kings, Madawaska, Northumberland, Queens, Restigouche, St. John, Sunbury, Victoria, Westmorland and York.

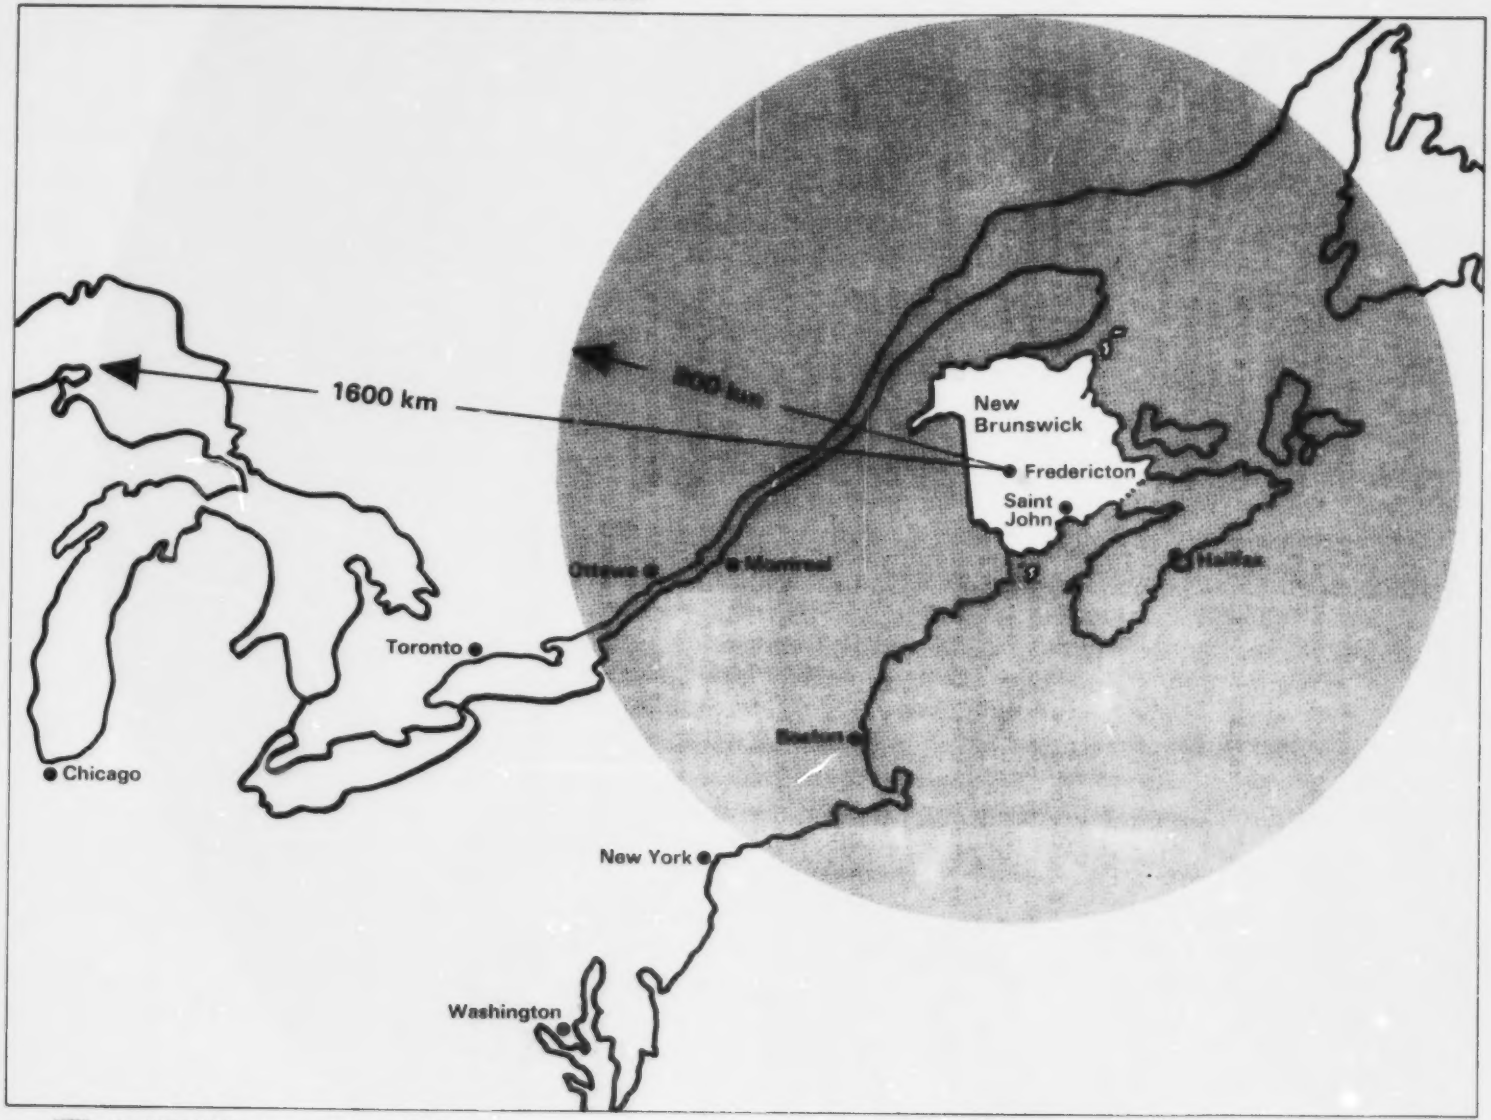
In this section every county constitutes a sub-section. Municipalities where manufacturing establishments may be located are listed alphabetically within each sub-section. Manufacturing establishments located in each municipality are grouped alphabetically.

For supplementary reference, Appendix 2 contains a municipal population index and a map of New Brunswick indicating the 15 counties.

SECTION 4
NEW BRUNSWICK MANUFACTURERS —
INDUSTRIAL PARKS CLASSIFICATION

The 40 industrial parks where manufacturing establishments are located are listed alphabetically in this section. The location of these parks is indicated and manufacturers located therein are listed alphabetically.

New Brunswick Market Access



43,000,000 consumers within overnight surface transportation

100,000,000 consumers

THE PROVINCE OF NEW BRUNSWICK

I. AN INTRODUCTORY PROFILE

LOCATION:

The Province of New Brunswick, on the Atlantic Coast of Canada, is a roughly rectangular area of about 28,000 square miles (73,440 square kilometres). Its approximate position on the map is between 45 to 48 degrees latitude, and 64 to 69 degrees longitude.

New Brunswick's capital city, Fredericton, in the southwestern part of the province, is 518 miles (829 km.) by highway from Montreal; 853 (1,368 km.) from Toronto; and 627 (1,003 km.) from New York. Flying time from the capital to Montreal is approximately 65 minutes; to Toronto, one hour 50 minutes; to Ottawa, one hour 30 minutes; to Boston (via Saint John), one hour and to New York (via Montreal), three hours, 10 minutes.

The province's major port city, Saint John, on the Bay of Fundy in the south, is 2,338 nautical miles from Panama; 2,977 from London; 3,020 from Antwerp; and 3,176 from Hamburg.

POPULATION & LABOUR MARKET

On July 1, 1988, New Brunswick's total population was estimated at 714,800 persons, an increase of 2,300 or 0.3 per cent over the previous year.

During 1987, New Brunswick's labour force increased at a rate of 2.2 per cent to 319,000 persons. At the same time, the number of persons employed increased 3.7 per cent to 277,000. This increase, following a significant decline in the number of employed in 1982 due to the economic recession, was higher than that recorded by Canada (2.8 per cent). Over the 1971 to 1987 period, some 80,000 new jobs were created.

1987 LABOUR MARKET

Labour Force	319,000
Employed	277,000
Unemployment Rate	13.2%

Post-secondary institutions in New Brunswick are responsive to the demands of the labour market, and have made available a broad range of professional and technical training programs. This, coupled with general improvements throughout the educational system in New Brunswick, has resulted in a labour force that is skilled, well-motivated and adaptable.

ECONOMY

The New Brunswick economy historically has been characterized by a dependence on the primary industries. Proximity to the United States, the locational advantage of year-round ice-free ports on the Atlantic Ocean and historical, cultural and economic ties with Western Europe have resulted in reliance on trade in export markets.

In 1987, New Brunswick's Gross Domestic Product at factor cost (GDP) was estimated at $9.4 billion. During the 1971 to 1987 period, the Province's GDP increased at an average annual rate of 11.6%, compared with an 11.5% growth rate for Canada. Over this period, inflation-adjusted GDP for the Province increased at an average annual rate of 3.4%, compared with a 3.6% rate of growth for Canada.

The total value of New Brunswick's exports in 1987 increased 13.9 per cent to $2,951 million. This represented over 28 per cent of GDP.

INDUSTRY

Although New Brunswick's industrial structure is still heavily oriented towards the extractive industries, the manufacturing sector is important as a generator of income and employment. During the 1971 to 1987 period, new capital invested in manufacturing in the province totaled over $3.5 billion. Major modernization programs and diversification into new products in the pulp and paper industries, as well as continued development of the food processing industries were the major contributors to manufacturing investment.

INDUSTRIAL FACTS
1987

Farm Cash Receipts	$248 million
Seafish Landings	
Value	$101 million
Volume	132 thousand metric tons
Lumber Production	1,761 thousand cubic metres
Value of Mineral Production	$701 million
Value of Manufacturing Shipments	$4,798 million
Retail Trade	$3,794 million

Source: Statistics Canada, Various Publications

In 1987, total wages and salaries in manufacturing increased 11.4 per cent to $807 million. In addition, the value of manufacturing shipments in 1987 reached $4.8 billion, compared with $4.3 billion in 1986.
The long-term outlook for New Brunswick's manufacturing sector has been improved by the availability of government financial incentive programs which have led to a healthy sustainable manufacturing sector.

TRANSPORTATION

In New Brunswick there are approximately 2,188.8 kilometres of arterial highways and 2,352.0 kilometres of collector roads, 95 per cent of which are hardsurfaced. The main highway system, including 612.7 kilometres of Trans-Canada Highway, links the province with the principal roads in the neighbouring provinces of Quebec and Nova Scotia, as well as the Interstate Highway System in the United States' eastern seaboard states.

New Brunswick is served by both major Canadian railways, the Canadian National Railway, and the Canadian Pacific Railway. Several major trucking companies are headquartered in the province.

Several ports in New Brunswick accommodate ocean vessels: Saint John on the Bay of Fundy and Newcastle-Chatham, Bathurst, Belledune and Dalhousie on the Gulf of St. Lawrence coast of the province.

Saint John, Bayside and Belledune are ice-free year round and the others are opened to navigation by icebreakers as required during the winter season.

Mainline air passenger jet services are provided to five New Brunswick airports by Air Canada, Canadian Airlines International, International Airlines and Air Nova. Air freighter service is also provided to Moncton on a scheduled basis. There are currently two air carriers providing turboprop passenger services to five New Brunswick points. Those carriers are Air Atlantic and Air Nova. There are eleven public licenced airports in the province and a number of operators providing charter air services.

II. DEPARTMENT OF COMMERCE AND TECHNOLOGY

The overall responsibility of the Department of Commerce and Technology is the development of the manufacturing, processing and selected service sectors of the New Brunswick economy.

The Department's major objectives are:
1. To strengthen and expand the industrial base in all regions of the province.
2. To ensure the ability of provincial firms to remain competitive through improvements in productivity and product quality.
3. To diversify the industrial base through growth in new products, expanded markets and new technologies.
4. To process New Brunswick's resources and products to the highest degree possible.

These objectives are achieved through the programs and services offered by the Department.
The Department provides New Brunswick industry with financial support, loans, guarantees and venture capital assistance, and may also take an equity position in companies. In addition, the Department provides financial and advisory assistance for a wide range of activities, including management, marketing, trade and product development services. The Department also provides advice on government purchasing requirements and procedures.

Agencies associated with the Department and reporting to the Minister of Commerce and Technology are:

— NEW BRUNSWICK INDUSTRIAL DEVELOPMENT BOARD
The Board, as provided for in the Commerce and Technology Act, meets regularly to assess and to make recommendations on all applications for financial assistance to industry. This assistance normally takes the form of a direct loan or loan guarantee.

— NEW BRUNSWICK INDUSTRIAL DEVELOPMENT APPEAL BOARD
If an application for assistance is rejected by the Development Board, the Commerce and Technology Act provides for the applicant to appeal this decision. The Appeal Board hears all appeals by allowing applicants to personally appear before it.

— PROVINCIAL HOLDINGS LTD.
A crown-owned corporation which holds and administers the Province's equity position in various companies, this agency may take an equity position in manufacturing and processing industries wishing to locate in New Brunswick.

III. REGIONAL ECONOMIC DEVELOPMENT COMMISSIONS

The Regional Economic Development Program provides for local participation in the economic development of each region of the province through the shared funding of autonomous Regional Economic Development Commissions.

The Regional Commissions provide an essential service in helping to identify and put into effect economic development opportunities within each region.

Functioning as independent agencies of the participating municipalities, the Commissions are in an excellent position to locate and encourage new entrepreneurs in their regions, and to support existing firms as well as assist in the delivery of other economic assistance programs.

IV. INFORMATION SOURCES

B.O.S.S.

As well as compiling the information contained in this directory, the Department of Commerce and Technology, in cooperation with Industry, Science and Technology Canada and other provinces, is helping to further develop a national sourcing system called "Business Opportunities Sourcing System" (B.O.S.S.). The system is now operational and is used by federal and provincial governments, trade commissioners, Chambers of Commerce, consulting firms, etc. to assist potential buyers of Canadian products in locating appropriate manufacturers and to identify market opportunities for Canadian suppliers. B.O.S.S. incorporates the latest in information technology.

New Brunswick companies currently registered in B.O.S.S. are prefixed in this directory with the symbol "†". Expanded product descriptions and the names of company sales officials for these firms can be obtained by contacting any B.O.S.S. information centre. Such information can be obtained in Moncton from Industry, Science and Technology Canada 857-6434 or in Fredericton from the Department of Commerce and Technology 453-2482.
